

Acceptance Testing

UAT Execution & Report Submission

Date	15 July 2026
Team ID	XXXX
Project Name	Emotion Detection and Learning Support Engine
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the **Emotion Detection and Learning Support Engine** project at the time of release to User Acceptance Testing (UAT).

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved. Severity 1 = Critical, Severity 2 = Major, Severity 3 = Moderate, Severity 4 = Minor.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	1	0	1
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	3	2	1	3	9
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	3	2	2	3	10

Notes: The 3 Severity-1 (Critical) defects were: (1) a keyword-matching collision in the BERT inference layer that caused "understand" to incorrectly trigger the Confident branch even when negated as "don't understand"; (2) an unconditional class-weighting bias that skewed BERT toward predicting "Confident" regardless of input; (3) a Gemini API key briefly committed in README.md during setup documentation, caught by GitHub's push protection before it reached the public repository and subsequently rotated. All three were fixed. The one "By Design" item reflects a decision to store the demo video externally (Google Drive) rather than in the Git repository, due to file size.

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested.

Section	Total Cases	Not Tested	Fail	Pass
BiLSTM Model Inference	6	0	0	6
BERT Model Inference	6	0	0	6
Keyword Boosting Layer	5	0	0	5
Mixed Emotion Detection	3	0	0	3
Gemini API Integration & Fallback	4	0	0	4
Analytics Dashboard (Plotly)	4	0	0	4
CSV Interaction Logging	3	0	0	3
Streamlit UI & Session State	5	0	0	5
Cross-Browser Compatibility	3	0	0	3
Totals	39	0	0	39
