

Brainstorming & Idea Prioritization Template

Date	15 July 2026
Team ID	XXXX
Project Name	AI Learning Assistant - Emotion-Aware Tutoring System
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Tejaswini	Text-based dual-model (BiLSTM + BERT) emotion detection from student messages	NLP / ML	1
2	Tejaswini	Real-time facial expression detection via webcam	Computer Vision	2
3	Tejaswini	Voice tone / prosody analysis during tutor calls	Audio / Speech	3
4	Tejaswini	Gamified reward and streak system to boost engagement	UX / Gamification	4
5	Tejaswini	Teacher-facing analytics dashboard of class-wide emotional trends	Analytics	5
6	Tejaswini	Peer-support matching system for stuck students	Social / Community	6

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Text-based dual-model (BiLSTM + BERT) emotion detection	High	High	1	Yes
2	Facial expression detection (webcam)	Low	High	3	No
3	Voice tone analysis	Low	Medium	4	No

4	Gamified reward system	High	Medium	2	No
5	Teacher analytics dashboard	Medium	Medium	5	No
6	Peer-support matching	Low	Low	6	No

Conclusion: The team selected the text-based dual-model emotion detection approach (Group 1) as the final direction, since it scored highest on both feasibility and importance, requires no additional hardware, and can be validated using well-established NLP architectures within the internship timeframe.
